Reviewing Scientific and Medical Literature. Information on just about any disease can be obtained from the published scientific literature. Medical and scientific journals publish articles written for scientists and health professionals. In a process called "peer-review," other professionals review these articles before they are published. Information for locating an article, its title, authors and when it was published is listed in PubMed search results. Using the condition name as your search term should locate articles that may be of interest to you. Other Sources of Information. Apart from the information listed above, several organizations are dedicated to helping individuals with genetic and rare diseases and provide an array of information. Get more information about 'Patient Education and Counseling' Journal. Check the Author information pack on Elsevier.com. The Editorial Board will include patients and other laypersons, health professionals, innovation leaders, and social scientists. The editorial process will assess scientific quality of the work as well as relevance.
and utility to patients and health professionals in real-world settings. Robust use of established measures is encouraged unless there is clear need for a new measurement approach.
